

Junior College 4-year Degree Act

HB 17 & SB 19

Fiscal Note

State Government Impact

The fiscal implications of the bill cannot be determined at this time. The bill could result in a net decrease in General Revenue due to decreased formula funding at general academic institutions and health related institutions, which could be partially offset by increased formula funding at public junior colleges in fiscal years 2020-2021. The bill could result in a net decrease in tuition and fee revenue at general academic institutions and health related institutions due to estimated declines in enrollment in certain programs. The net change in General Revenue and institutional funds for institutions of higher education would depend on the number of baccalaureate degree programs offered by public junior colleges and the number of students who choose to enroll in those programs instead of programs at general academic and health related institutions.

Local Government Impact

No significant fiscal implication to units of local government is anticipated. This analysis assumes any costs associated with this bill would be paid for out of institutional funds, partially offset by any state appropriations from formula funding.
